

COSC-254 DATA MINING
HOMEWORK 05 — TRIANGLES
Due: Wednesday, March 27, 2019, 1.59pm

Exercise 1 Exercise 10.7.3, page 404 of the MMDS book. Skip part c). Selections are explained in Section 2.3.4 of the same book.

How to submit

Submit your work at <https://www.cs.amherst.edu/submit> or via `cssubmit` from `romulus/remus`, as a *single* archive file with name `username.ext` where `username` is your user name and `ext` is one of `.zip`, `.tar.bz2`, or `.tar.gz` (no `.rar`, please).

The archive must contain a *single* directory with name `username`. This directory must contain a subdirectory with name `X` for each Exercise `X`, or a single subdirectory with name `1` in case of projects. All files (source code or otherwise) for each exercise (or project) must be in the directory for that exercise. Directories containing source code should contain a `README.txt` file explaining how to run the code in that directory. For non-code answers, please submit a `.pdf`. You can find an example archive at <http://bit.ly/DM19sub>.

Please post to the Moodle forum if you have problems with the submission.
